

ABSTRACT OF THE DISCLOSURE

The present invention relates to compounds for an under coat (A), a mid coat (B) and a top coat (C) of the imitation pearl, in which the compounds for the under and mid coats (A) and (B) of the imitation pearl are prepared by dissolving celluloid into a 5 mixed solution of acetone and ethylacetate and another mixed solution of butylacetate and amylacetate, and adding a pigment to the celluloid solution, and the compound for the top coat (C) of the imitation pearl is prepared by dissolving celluloid into a mixed solution of ethylacetate and butylacetate and adding a pigment to the celluloid solution.
